Experience

Daniel Niwinski is a lawyer at our firm specializing in new technology law, cybersecurity and data protection. He has experience working in technology companies, banking and legal consulting.

In his previous practice, he has dealt with building information security systems, legal and regulatory implementations in the field of personal data protection and cybersecurity. He has extensive experience in information security management projects. He is certified as a lead auditor of an information security management system (ISO 27001) and certified as a Data Protection Inspector. While working with an IT company, he built a successful information security department from scratch. For a year, he served as Senior GRC Analyst at one of the leading banks in Poland.

Daniel also has extensive training experience. He has presented on information security issues at, among others, a data protection congress and has trained thousands of Data Protection Officers on topics related to risk management, process management and building internal documentation. He has also published articles in magazines and industry portals.

Daniel graduated from the Faculty of Law at the SWPS University of Humanities and Social Sciences, defending his master's thesis entitled "Act of «self-dealing» as a legal circumstance of dissolution of limited liability company."
